**W**ith more concern for the environment and also a closer eye on costs, more people are turning to us for a faster, more economical solution to all their finishing needs.

Based at Albion Works in Leeds, we work nationally offering a daily collection and delivery service all over the UK. Over the last 15 years we have grown from the smallest galvanizer in the country to the largest metal finishing group in the North of England.

As the only in house provider offering a full galvanizing and powder coating service within 150 miles of Leeds; we will collect, treat, and deliver back to you meaning that you don't need to coordinate different haulage companies and subcontractors at each stage of the process saving you money, delays and most importantly your time.

We pride ourselves on the highest quality standard of work, we deliver through experience and also by using the latest technology, materials and processes. Continually investing in our facility, we have combined galvanizing to ISO1461:2009, powder coating to EN13438:2013 to deliver you the most durable and robust coatings available in the market.

Whatever your galvanizing and powder coating project is; from fencing to ornate ironwork, balconies to construction steelwork, call us to see how we can help with your project.

For more information and a quote, please call 0113 243 1111 or email [Service@leedsgalvanising.co.uk](mailto:Service@leedsgalvanising.co.uk)

## PROCESS

After being galvanized, the fabrication is taken to the powder coating plant

Your products are loaded onto our line and prepared to be coated

After being checked by quality control, your order is delivered back to you as quickly as possible

The installation will reflect the quality and commitment shown by LGPC.

## Paint and Powder Removal

Installed in 2010, our thermal pyrolysis oven is an environmentally friendly way of removing paints, varnish and powder coatings. We have installed extra burners in the system so that the potentially toxic gases created in the burning process are incinerated and transformed into Co<sub>2</sub> which is a much friendlier gas to release into the atmosphere.

The thermal pyrolysis oven is quick and efficient and we can guarantee to remove 100% of all old coatings which can salvage metal work which at one time would have just been replaced with a completely new installation at a significantly greater cost.

# Galvanizing

Using state of the art technology we're able to offer a high quality finish and be flexible to your needs so we can help prevent rust and protect your steel or iron work. We can process straight lengths up to 13 metres long and frame work up to 4.5 metres high.

All of our materials adhere to the strict criteria set by BS EN ISO1461:2009 and we have quality checks throughout the process.

Plus, we offer an overnight service so your galvanizing project could be ready in as little as 12 hours.

For more information and a quote, please call 0113 243 1111 or  
email [Service@leedsgalvanising.co.uk](mailto:Service@leedsgalvanising.co.uk)

# Powder coating

Having invested heavily, we have specialist equipment and processes in our powder coating plant to cater specifically for galvanized materials. We can process lengths up to 7 metres long and 2.6 metres high meaning we can coat large and unusual shaped fabrications on our automatic line.

We are able to offer extensive stocks of RAL and BS colours and we ensure all projects are coated to comply with EN13438:2013.

And because we know you want a quick and efficient service, we are able to turn fabrications around in 24 hours as our plant works day and night.

# Shot Blasting

We offer a shot blasting service for higher specifications. Please call us for more details.

For more information and a quote, please call 0113 243 1111 or  
email [Service@leedsgalvanising.co.uk](mailto:Service@leedsgalvanising.co.uk)

# Haulage

We have a large fleet of vehicles suitable for transporting everything from a single item right through to a 23 tonne load. We work nationally and you can be guaranteed of a reliable and friendly service.

Because all of our processes are under one roof, there is only one collection and one delivery in the whole process. This avoids you having to coordinate several sub-contractors and deal with the additional cost and time to get your project delivered.

For more information and a quote, please call 0113 243 1111 or email [Service@leedsgalvanising.co.uk](mailto:Service@leedsgalvanising.co.uk)

# Case Study - Dingley Reservoir

Ultra Fabrications in Halifax were commissioned by Yorkshire Water to refurbish and renew the hand rails and fencing leading to the water house inlet at Dingley Reservoir, Huddersfield as cost effectively as possible. The installation was over 100 years old and needed a lot of work to bring it back up to standard.

Rather than installing a brand new installation, Ultra Fabrications were able to offer an even more cost effective and environmentally friendly option to Yorkshire Water by being able to restore the existing steelwork with our help. They removed the panels and we stripped and recoated the steelwork using modern techniques to protect the installation for years to come.

By utilising all of our services under one roof, Ultra Fabrications only had to liaise with us rather than several subcontractors and they were able to save significant amounts of money on the project and protect panels which would have otherwise been taken to a scrap yard.

Once we had picked up the panels and brought them back to our facility, they were inspected and a detailed assessment was made. The thermal pyrolysis oven was then set to tailored temperature and timed settings to fully remove the existing coating.

After being stripped and checked by quality control, the panels were sent to be galvanized.

The panels were powder coated and delivered back to Dingley Reservoir where Ultra Fabrications were able to reinstall the railings and fencing after having already made minor modifications to make it easier to refit.

The result was a cost effective renovation delivered in just 5 days that Yorkshire Water were delighted with. What's more, it will last for years to come and we avoided the unenvironmentally friendly option of the old installation going to the scrap yard.

## Leeds Galvanising & Powder Coating Ltd

We strive to be the best in-house one-stop shop in the UK for your finishing solutions and work hard to:

- Make your project easier and less stressful
- Save you money
- Avoid delays and get the job done quickly
- Recycle and be kinder to the environment
- Deliver a high quality finished product
- Always be relied upon delivering nationwide

Don't pay for an expensive full new installation if you don't have to. Using our refurbishment techniques we can offer you a full old for new service which not only reduces the cost significantly, but also reduces carbon footprint.

Plus, our prices are competitive prices, so please call for more information and to see how we can help you.
